

Project

UMMC Cancer Registry

Objective

The UMMC Cancer Registry is a point of care data capture system that is aligned to the Malaysian National Cancer Registry and The International Agency for Research on Cancer reporting. Twenty units in UMMC developed the requirements to address needs of cancer reporting in UMMC.

The UMMC Cancer Registry objectives:

- To establish and maintain a cancer incidence reporting system
- The registry serves as an information resource to support research and quality improvement of patient care in UMMC
- The UMMC Cancer Registry will be reported to the National Cancer Registry through a backend platform
- Audits and evaluation of the quality of the cancer registry data (completeness and timeliness) will be routinely carried out.

Researcher

Prof Nur Aishah Mohd Taib (Department of Surgery)

A/P Pang Yong Kek (Department of Medicine)

A/P Adlinda Alip (Department of Clinical Oncology)

A/P Koh Peng Soon (Department of Surgery, Faculty of Medicine)

A/P Sarinder Kaur (Institute of Biological Science, Faculty of Science)
